

#### DRAGON RACING FUELS EXTENDS SUPPORT TO SNOWCROSS RACERS

Dragon Racing Fuels is proud to announce the support of Nick Pattyn and Zak Mason of Stud Boy Racing and Greg Weever of Weever Racing. All three racers will be powered by Dragon Racing Fuels Tarragon 100. Chuck Newton, co-owner of Dragon Racing Fuels says, "We are extremely proud to partner with Stud Boy Racing and Weever Racing. For us to be able to showcase our top performing fuels on the snow with such a talented group of guys is truly incredible. This will be an exciting winter for us at Dragon Racing Fuels."

Nick Pattyn (198) and Zak Mason (863) both run mainly on the ISOC National Circuit in the Sport Super Stock Class under the Stud Boy Racing banner. Ron Pattyn, Nick's father, says, "We have had a long relationship with Kevin Majewski and we think it is great for Dragon Racing Fuels to come on board with us for this race season." Kevin agrees, "I have known Ron for quite some time now and really enjoy how he runs not only his business Stud Boy Traction, but his race team as well. I only see this relationship getting better and better every year!"

Greg Weever (78) is running the ISOC National Circuit in the Pro Am Plus 30 Class. "I was not confident the season was going to happen," mentioned Weever "I am grateful to Irish Saunders who worked hard to secure a sponsor for me. I have worked with many different blends from Dragon Racing Fuels, and each one has the same things in common; consistency, quality and, power, all at a fair price." "That is something we hang our hat on, and for people like Greg to be able to see how much time and effort we put into all of our fuels is fantastic," said Kevin.

Please see any of these racers for more information on Dragon Racing Fuels, or call Kevin Majewski @ 269-929-6241.
